Achieving Six Sigma Quality for IC Design

By Jin Zhang, Real Intent, Inc.

The manufacturing industry saw significant improvement in quality within the last few decades due to the implementation of Lean Manufacturing process and Six Sigma quality control measures.

Lean Manufacturing, also called Just-in-time (JIT), was pioneered by Toyota to reduce non value added waste in the manufacturing process through continuous improvement and producing only when needed with minimum inventory of raw materials and finished goods. Six Sigma is a well known, data driven set of standards that use in-depth statistical metrics to eliminate defects and achieve ... www.realintent.com

Real Intent, Verific Celebrate Eight-Year Collaborative Partnership

ALAMEDA, Calif.—(BUSINESS WIRE)—Real Intent, Inc., the leading supplier of formal verification software for electronic design, and Verific Design Automation each celebrates its 10 year anniversary in 2009 and a long-term partnership that spans the last eight years.

Since 2001, Verific, the leading provider of System-Verilog, Verilog and VHDL front-end software, has supplied Real Intent with a VHDL parser and analyzer. This thriving relationship was ... www.realintent.com

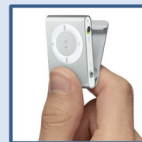

To celebrate **Real Intent's 10 Year Anniversary** and to show appreciation to our customers, we are offering a 2-for-1 Appreciation Promotion from **February 14, 2009** to **February 14, 2010**. This promotion applies to the entire Real Intent family of automatic verification software.
