## Real Intent's, Jin Zhang, is presenting at the DAC 2009 Exhibitor Forum

**When:** **Wednesday, July 29 from 1:40-2:15pm**

**Where:** [DAC Exhibitor Forum](#), North Hall, Booth 4359

### *Unleash the Power of Formal Analysis for CDC Verification*

In this presentation, we will look at the application of formal techniques to clock domain crossing (CDC) verification. Critical design errors can be detected by performing formal analysis on the data and control crossings of the design. Examples will be presented to demonstrate the power of formal techniques for CDC verification . . . [www.realintent.com](http://www.realintent.com)

## Real Intent Announces New Technology Growth at DAC 2009!

San Jose, California – June 29, 2009- [Real Intent](#) Inc. will celebrate growth in the number of verification solutions and the technologies embedded in them at the [Design Automation Conference](#) (DAC 2009) in San Francisco next month by showcasing its family of products — Ascent™, Meridian™, and PureTime™. . . .
